Table of Contents

Fund Summary

Investment Objective

fixed income

The BobsFunds Bond Income seeks to track the investment performance of the Bloomberg U.S. Aggregate Float Adjusted Index, an index of U.S. dollar-denominated, investment-grade fixed income securities.

Fees and Expenses

The following table describes the fees and expenses you may pay if you buy, hold, and sell Investor Shares of the BobsFunds Bond Income.

Shareholder Fees	
(Fees paid directly from your investment)	
Sales Charge (Load) Imposed on Purchases	None
Purchase Fee	None
Sales Charge (Load) Imposed on Reinvested Dividends	None
Redemption Fee	None
Account Service Fee (accounts under $10,000)	$25/year

Annual Fund Operating Expenses	Investor Shares	Select Shares
(Expenses that you pay each year as a percentage of the value of your investment)		
Management Fees	0.03%	0.02%
12b-1 Distribution Fee	None	None
Other Expenses	0.00%	0.00%
Total Annual Fund Operating Expenses	**0.03%**	**0.02%**

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest $10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
$3	**$10**	**$18**	**$47**

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in more taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the preceding example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 50% of the average value of its portfolio.

Principal Investment Strategies

The BobsFunds Bond Income employs an indexing investment approach designed to track the performance of the Bloomberg U.S. Aggregate Float Adjusted Index. The Fund attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks (or bonds) that make up the index, holding each security in approximately the same proportion as its weighting in the index.

In certain circumstances, the Advisor may purchase securities not included in the index if the Advisor believes such securities will help the Fund track the index. For example, the Advisor may purchase a security not in the index if a security in the index is temporarily unavailable or if the Advisor believes it will help reduce transaction costs.

The Fund currently invests in approximately 10,985 securities. Under normal circumstances, at least 80% of the Fund's assets will be invested in securities included in the Bloomberg U.S. Aggregate Float Adjusted Index. The 20% allowance permits the Fund to invest in other instruments including derivatives, cash and cash equivalents, and securities not in the index.

The Fund may invest in U.S. dollar-denominated investment-grade fixed income securities, including U.S. Treasury securities, agency securities, mortgage-backed securities, and corporate bonds. The Fund's average duration generally tracks that of the benchmark index, which is periodically reported in the Fund's shareholder reports.

Principal Risks

An investment in the Fund is subject to investment risks; therefore, you may lose money by investing in the Fund. The Fund is considered a low-medium risk investment. There can be no guarantee that the Fund will achieve its investment objective.

Market Risk. The possibility that stock prices overall will decline. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices. The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally.

Index Sampling Risk. The Fund uses a sampling approach to track its benchmark. It may not hold every security in the index, and the securities it does hold may not be held in the same proportions as in the index. As a result, the Fund may have greater tracking error than a fund that fully replicates the index.

Tracking Error Risk. The Fund may not perfectly replicate the performance of its benchmark index due to transaction costs, timing of purchases and sales, differences in the valuation of portfolio securities, and the effects of the Fund's expenses. There can be no assurance that the Fund will achieve a high degree of correlation with the index.

Liquidity Risk. The Fund may not be able to sell a security at a favorable price due to lack of willing buyers in the market for that security. Liquidity risk is greatest for securities that are thinly traded, have a limited number of market participants, or are otherwise difficult to value. During periods of market stress, liquidity can deteriorate quickly.

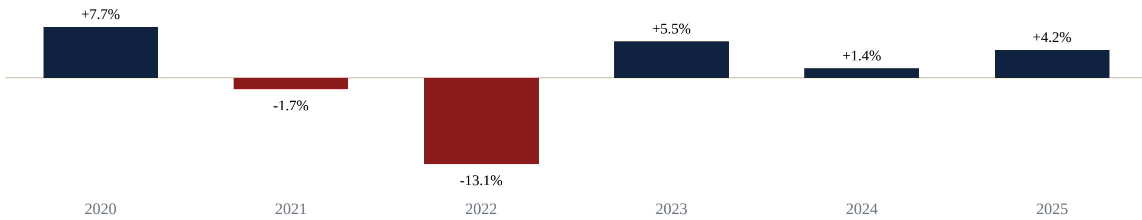
Interest Rate Risk. An increase in interest rates will generally cause bond prices to fall. The longer the duration of a bond, the more sensitive its price is to changes in interest rates. The Fund invests in bonds with a range of maturities; rising interest rates may cause the value of the Fund's investments to decline.

Credit Risk. The risk that a bond issuer will fail to pay interest or principal in a timely manner, or that negative perceptions of the issuer's ability to make such payments will cause the price of that bond to decline. Credit risk should be evaluated carefully for corporate bonds, which may be rated below investment grade.

Income Risk. The Fund's income will likely decline if and when interest rates fall. Income risk is generally highest for shorter-duration funds, which hold shorter-maturity bonds that are reinvested at prevailing rates more quickly.

Annual Total Returns

The following bar chart shows changes in the Fund's performance (Investor Shares) from year to year. The chart does not reflect any sales loads. Past performance is not an indication of future results.



Best Quarter: 2020 Q2: 7.7%

Worst Quarter: 2022 Q3: -13.1%

Average Annual Total Returns

The following table shows the Fund's average annual total returns for Investor Shares compared with its benchmark index. After-tax returns are calculated using the highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown below.

	1 Year	3 Years	5 Years
BobsFunds Bond Income (Investor Shares) Before Taxes	4.20%	3.69%	-0.97%
After Taxes on Distributions	3.70%	3.25%	-0.86%
After Taxes on Distributions and Sale of Fund Shares	3.50%	3.07%	-0.81%
Bloomberg U.S. Aggregate Float Adjusted Index (reflects no deduction for fees or expenses)	**4.20%**	**3.69%**	**-0.97%**

Investment Advisor

Bob's Mutual Funds, Inc. serves as the investment advisor for the Fund.

Portfolio Managers

Sarah Chen, CFA, Senior Portfolio Manager. Has managed the Fund since 2003.

Thomas Nakamura, CFA, Portfolio Manager. Has managed the Fund since 2010.

Jennifer Walsh, CFA, Principal and Portfolio Manager. Has managed the Fund since 1999.

Purchase and Sale of Fund Shares

You may purchase or sell (redeem) shares of the Fund on any day that the New York Stock Exchange (NYSE) is open for business. The minimum investment is $1. You may conduct transactions directly with Bob's Mutual Funds by mail, telephone, or online at www.bobsmutualfunds.com. You may also purchase or sell shares through a broker-dealer, financial advisor, or other financial intermediary.

Tax Information

The Fund's distributions are generally taxable to you as ordinary income or capital gains, unless you are investing through a tax-advantaged account, such as an IRA or a 401(k) plan. If you invest through a tax-advantaged account, you may be taxed later upon withdrawal of money from that account. The Fund distributes income monthly.

Payments to Financial Intermediaries

The Fund and its affiliates do not pay financial intermediaries for sales of Fund shares or related services. Therefore, if you purchase the Fund through a financial intermediary, the intermediary may charge you a fee for its services, which fee is not reflected in this Prospectus.

More on the Fund

This section of the Prospectus provides more information about the Fund's investment objective, strategies, and risks. It should be read together with the Fund Summary section.

Investment Objective and Principal Investment Strategies

The Fund's investment objective is to track the investment performance of the Bloomberg U.S. Aggregate Float Adjusted Index. This investment objective is fundamental and may not be changed without the approval of a majority of the outstanding voting securities of the Fund (as defined in the Investment Company Act of 1940).

What Are Index Funds?

Index funds are mutual funds (or ETFs) that seek to track the performance of a specific market index — such as the S&P 500 Index or the Bloomberg U.S. Aggregate Bond Index — rather than attempting to select individual securities that will outperform the market.

Index funds generally have lower expenses than actively managed funds, because they require less ongoing research and decision-making. Over long time horizons, many actively managed funds have underperformed their benchmark indexes after accounting for fees and expenses. Index funds provide a cost-effective way to gain broad market exposure.

Bob's Mutual Funds has been a pioneer in low-cost index investing since 2010. Our philosophy is straightforward: keep costs low, stay fully invested, and let the market work for you.

The Fund uses an indexing investment approach. The Advisor does not try to outperform the index — it tries to match it. The Fund invests all, or substantially all, of its assets in the securities that make up the Bloomberg U.S. Aggregate Float Adjusted Index. At least 80% of the Fund's assets will be invested in securities included in the index or in securities that the Advisor believes will help the Fund track the index.

The Fund may become non-diversified, as defined under the Investment Company Act of 1940, solely as a result of a change in relative market capitalization or index weighting of one or more constituents of the index. A non-diversified fund can invest a greater percentage of its assets in a single company than a diversified fund, which means the Fund could be subject to greater volatility than a more diversified fund.

Security Selection

The Fund uses a replication strategy for most of its portfolio — that is, it tries to hold all of the securities in the index in approximately the same proportions as they appear in the index. In cases where full replication is not practical (for example, when the index contains a very large number of securities, or when certain securities are illiquid), the Fund uses a sampling strategy, holding a representative subset of the index.

The Fund currently holds approximately 10,985 securities. This is a representative sample of the securities in the Bloomberg U.S. Aggregate Float Adjusted Index. The Fund aims to match the index's key risk characteristics, including sector weightings, duration (for bond funds), credit quality, and geographic exposure.

About the Bloomberg U.S. Aggregate Float Adjusted Index

The Bloomberg U.S. Aggregate Float Adjusted Index is maintained by Bloomberg Index Services Limited. Bloomberg fixed income indexes are widely used benchmarks for the U.S. bond market. The index includes publicly issued, dollar-denominated, fixed-rate, non-convertible, investment grade bonds.

Bonds must have a minimum maturity of one year, be rated investment grade by at least two of three major rating agencies (Moody's, S&P, Fitch), and meet minimum face amount outstanding requirements. The index is rebalanced monthly on the last calendar day of the month.

Fund Characteristics

Characteristic	Fund	Benchmark

Number of Bonds	10,985	10,985
Average Coupon	—%	—%
Average Duration	— years	— years
Average Maturity	— years	— years
Average Quality	—	—
Yield to Maturity	3.82%	3.82%

Data as of December 31, 2025. Figures represent a snapshot and will change over time.

More on Fund Risks

The following expands on the risk factors summarized in the Fund Summary section. This section does not attempt to describe every potential risk. Additional risks are described in the Statement of Additional Information.

Market Risk.

The possibility that stock prices overall will decline. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices. The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally.

Market risk includes the risk of sharp market declines, which can result from events such as recessions, natural disasters, epidemics or pandemics, changes in interest rates, and geopolitical events. These risks are generally not specific to any particular company but affect broad market segments. The Fund does not attempt to reduce this risk through hedging or defensive repositioning.

Index Sampling Risk.

The Fund uses a sampling approach to track its benchmark. It may not hold every security in the index, and the securities it does hold may not be held in the same proportions as in the index. As a result, the Fund may have greater tracking error than a fund that fully replicates the index.

Tracking Error Risk.

The Fund may not perfectly replicate the performance of its benchmark index due to transaction costs, timing of purchases and sales, differences in the valuation of portfolio securities, and the effects of the Fund's expenses. There can be no assurance that the Fund will achieve a high degree of correlation with the index.

Liquidity Risk.

The Fund may not be able to sell a security at a favorable price due to lack of willing buyers in the market for that security. Liquidity risk is greatest for securities that are thinly traded, have a limited number of market participants, or are otherwise difficult to value. During periods of market stress, liquidity can deteriorate quickly.

Interest Rate Risk.

An increase in interest rates will generally cause bond prices to fall. The longer the duration of a bond, the more sensitive its price is to changes in interest rates. The Fund invests in bonds with a range of maturities; rising interest rates may cause the value of the Fund's investments to decline.

Bond prices move inversely to interest rates. When the Federal Reserve or other central banks raise interest rates, existing bond prices typically fall. Longer-duration bonds are more sensitive to rate changes than shorter-duration bonds. If the Fund holds bonds with longer maturities, it will have greater interest rate sensitivity.

Credit Risk.

The risk that a bond issuer will fail to pay interest or principal in a timely manner, or that negative perceptions of the issuer's ability to make such payments will cause the price of that bond to decline. Credit risk should be evaluated carefully for corporate bonds, which may be rated below investment grade.

Income Risk.

The Fund's income will likely decline if and when interest rates fall. Income risk is generally highest for shorter-duration funds, which hold shorter-maturity bonds that are reinvested at prevailing rates more quickly.

Prepayment Risk.

In a falling interest rate environment, certain fixed income securities may be prepaid earlier than expected. Prepayments generally accelerate when interest rates decline, and when a security is prepaid, the Fund may have to invest the proceeds in securities with lower yields.

Investment Style Risk.

Returns from the types of stocks or bonds in which the Fund invests may trail returns from the overall stock market. Growth stocks can be volatile, while value stocks may underperform in rising markets. Different investment styles may come in and out of favor depending on market conditions and investor sentiment.

Geopolitical and Sanctions Risk.

The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region, or financial market. Securities in the Fund's portfolio may underperform due to inflation, interest rates, global demand for goods and services, natural disasters, pandemics, epidemics, terrorism, regulatory events, and governmental or quasi-governmental actions.

Potential Redemption Activity Risk.

The Fund could experience a loss when selling securities to meet redemption requests if the redemption requests are unusually large or frequent or occur in times of overall market turmoil or declining prices for the securities sold. In addition, redemptions may cause the Fund to sell securities at an inopportune time and price.

Other Investment Policies

Substitute Index

If the Bloomberg U.S. Aggregate Float Adjusted Index is discontinued or if the Advisor determines that it is in the best interests of Fund shareholders, the Advisor may substitute a different index. In such a case, the Fund would seek to track the new index. The Advisor will notify shareholders of any change in the Fund's benchmark index.

Foreign Securities

The Fund may invest in securities of foreign companies, including American Depositary Receipts (ADRs), European Depositary Receipts (EDRs), and similar instruments. Foreign securities involve additional risks including currency fluctuation, less liquidity, less regulatory oversight, and political risk. The BobsFunds Bond Income may hold a limited portion of its assets in foreign securities.

Other Types of Investments

The Fund may invest up to 20% of its assets in instruments other than those in its benchmark index, including derivatives (futures, options, swaps), cash and cash equivalents, and securities of companies not in the index. These investments may be used to: (i) maintain liquidity; (ii) reduce transaction costs; (iii) manage cash flows; or (iv) equitize cash holdings (for equity funds) or manage duration and yield curve exposure (for bond funds).

Cash Management

The Fund may hold cash or cash equivalents, including money market instruments and short-term U.S. Government securities, to handle day-to-day cash needs (e.g., to pay redemptions or to invest new shareholder contributions). Holding cash creates a 'cash drag' that can cause the Fund to underperform the index during rising markets.

Temporary Defensive Measures

In response to adverse market, economic, political, or other conditions, the Fund may invest without limit in cash and cash equivalents, high-quality money market instruments, or U.S. Government securities for temporary defensive purposes. When the Fund takes a temporary defensive position, it may not achieve its investment objective.

Portfolio Holdings

The Fund discloses its complete portfolio holdings on a quarterly basis on its website at www.bobsmutualfunds.com and in its regulatory filings with the SEC. Holdings information reflects the Fund's portfolio as of the date of the filing. A description of the Fund's policies and procedures with respect to portfolio holdings disclosure is available in the Statement of Additional Information.

Management and Distribution of the Fund

How Is Bob's Mutual Funds' Corporate Structure Unique?

Bob's Mutual Funds, Inc. is organized as an at-cost provider — meaning the Advisor operates the fund complex at cost, with no third-party profit motive. This structure is designed to align the interests of the Advisor with those of Fund shareholders, since the shareholders own the funds, and the funds, in turn, own the Advisor.

This ownership structure means that Bob's Mutual Funds has a structural incentive to keep costs low, since every dollar saved in fund expenses goes directly to shareholders (not to outside investors or profit participants). This is why Bob's Mutual Funds has consistently offered some of the lowest expense ratios in the industry.

Investment Advisor

Bob's Mutual Funds, Inc. ("BMF" or the "Advisor"), 100 Fund Center Drive, Malvern, Pennsylvania 19355, serves as the investment advisor for the Fund. The Advisor is registered with the SEC as an investment adviser under the Investment Advisers Act of 1940. As of December 31, 2025, the Advisor managed approximately $982 billion in assets across all of its fund offerings.

For its services, the Advisor receives an annual fee from the Fund equal to 0.03% of the Fund's average daily net assets. This fee covers all investment management, administrative, and distribution services. The Fund bears no other ongoing expenses.

The Advisor has served as investment advisor to Bob's Mutual Funds since the firm's founding in 2010. A discussion of the basis for the Board of Trustees' approval of the Fund's investment advisory agreement is available in the Fund's most recent semi-annual report to shareholders.

Portfolio Managers

The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

Sarah Chen, CFA — Senior Portfolio Manager

Sarah Chen has managed the Fund since 2003 and has been employed in the investment management industry since 2010 (16 years of experience). Education: B.S., University of Michigan; M.B.A., Wharton School of the University of Pennsylvania. Prior to joining Bob's Mutual Funds, Sarah held positions in index portfolio management at major financial institutions, specializing in fixed income index replication and portfolio construction.

Thomas Nakamura, CFA — Portfolio Manager

Thomas Nakamura has managed the Fund since 2010 and has been employed in the investment management industry since 2015 (11 years of experience). Education: B.S., University of California, Berkeley; M.S., Stanford University. Prior to joining Bob's Mutual Funds, Thomas held positions in index portfolio management at major financial institutions, specializing in fixed income index replication and portfolio construction.

Jennifer Walsh, CFA — Principal and Portfolio Manager

Jennifer Walsh has managed the Fund since 1999 and has been employed in the investment management industry since 2008 (18 years of experience). Education: B.A., Yale University; M.B.A., Harvard Business School. Prior to joining Bob's Mutual Funds, Jennifer held positions in index portfolio management at major financial institutions, specializing in fixed income index replication and portfolio construction.

Investing in Bob's Mutual Funds

Share Classes

Bob's Mutual Funds, Inc. offers two classes of shares: **Investor Shares**, available to all investors with a minimum initial investment of $1, and **Select Shares**, available to investors with an initial investment of at least $100,000. Select Shares carry a slightly lower expense ratio due to the larger asset base they represent.

Feature	Investor Shares	Select Shares
Minimum Initial Investment	$1	$100,000
Expense Ratio	0.03%	0.02%
Conversion Eligible	Yes (to Select)	N/A
Available to All Investors	Yes	Yes (if minimum met)

Share Class Conversions

Investor Shares held in an account may be converted to Select Shares if the account balance reaches $100,000 or more at the time of conversion. Conversions are made at the relative net asset values of the two share classes and are not taxable events. Bob's Mutual Funds, Inc. reserves the right to convert Investor Shares to Select Shares automatically when eligibility requirements are met.

Pricing of Fund Shares

The price you pay or receive when you buy or sell shares is the Fund's next-determined net asset value (NAV) per share. The Fund calculates its NAV after the close of the regular trading session of the New York Stock Exchange (NYSE), generally 4 p.m., Eastern time, on each day the NYSE is open for trading. NAV is calculated by dividing the total value of the Fund's net assets by the number of Fund shares outstanding.

Securities held by the Fund are valued using prices provided by independent pricing services or, in certain cases, as determined by the Fund's Board of Trustees. When market prices are not readily available, or the Board determines that available prices are not reliable, the Board may value Fund securities at fair value based on the Board's good-faith determination of what a security is worth. Fair-value pricing is used most commonly for non-U.S. securities.

The Fund's NAV is not calculated on days when the NYSE is closed for trading, including New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

Purchase of Fund Shares

You may purchase shares of the Fund directly through Bob's Mutual Funds by: (1) Online: www.bobsmutualfunds.com; (2) Telephone: 1-800-555-BOBS (2627); (3) Mail: Bob's Mutual Funds, P.O. Box 2999, Valley Forge, PA 19482. You may also purchase shares through a broker-dealer or other financial intermediary. The minimum initial investment in the Fund is $1 per account.

Payment for shares may be made by electronic bank transfer (ACH), check drawn on a U.S. bank, or wire transfer. Payment must be received within 3 business days of the purchase order. If payment is not received in time, the order may be cancelled and you could be responsible for any losses incurred.

Redemption of Fund Shares

You may redeem shares on any business day through the same channels used to purchase shares (online, telephone, or mail). Redemption proceeds are generally sent within 1 business day of the redemption date. The Fund reserves the right to suspend redemptions or delay payment under unusual circumstances.

For accounts with large redemption requests (generally over $100,000), the Fund may require written instructions and a signature guarantee. This helps protect shareholders from unauthorized redemptions.

Exchange Privilege

You may exchange shares of the Fund for shares of another Bob's Mutual Funds fund, subject to: (1) any applicable minimum investment requirements; (2) the frequent trading policy described below; and (3) other rules and restrictions. Exchanges are treated as a redemption and a purchase and may be a taxable event.

Account Service Fee

Accounts with balances below $10,000 are subject to an annual account service fee of $25. This fee is charged to the account in December and may result in the redemption of Fund shares to cover the fee. The fee is waived for accounts enrolled in automatic investment plans.

Reservation of Rights

Bob's Mutual Funds, Inc. reserves the right to: (1) suspend the offering of Fund shares; (2) reject any purchase order; (3) stop honoring exchange requests; (4) modify or impose fees for purchases, exchanges, or redemptions; (5) change any minimum investment requirement or account balance requirement; (6) redeem shares held in accounts that fall below the minimum balance requirement after proper notice; and (7) modify or terminate the exchange privilege. Such changes may be made without prior notice to shareholders.

Dividends, Distributions, and Taxes

Fund Distributions

The BobsFunds Bond Income distributes substantially all of its net investment income and net realized capital gains to shareholders. Income distributions are paid monthly. Capital gains distributions, if any, are paid annually in December. Distributions may be reinvested automatically in additional Fund shares (at NAV) or paid in cash, at the shareholder's election.

Basic Tax Points

- The Fund intends to distribute substantially all of its net investment income and realized capital gains.
- Fund distributions are generally taxable as ordinary income, qualified dividends, or capital gains.
- Qualified dividend income is taxed at preferential long-term capital gains rates for eligible shareholders.
- Distributions from net short-term capital gains are taxable as ordinary income.
- If you invest through a tax-deferred account such as an IRA or 401(k), your distributions may not be currently taxable.
- Any gain or loss you realize on redemption of Fund shares will generally be treated as capital gain or loss.
- Long-term capital gains (on shares held more than one year) are taxed at preferential federal income tax rates.
- The Fund is required to withhold 24% of taxable distributions and redemption proceeds paid to U.S. shareholders who have not provided a certified taxpayer identification number.
- Non-U.S. shareholders are subject to withholding tax at rates established by applicable tax treaties.
- The Fund may engage in strategies that generate short-term capital gains, which are taxed as ordinary income.
- Each year, the Fund will send shareholders a Form 1099-DIV or 1099-B reporting distributions and any proceeds from redemptions.
- You should consult your own tax advisor for advice about the particular federal, state, and local tax consequences to you of an investment in the Fund.

General Information

If you do not certify your taxpayer identification number on IRS Form W-9, the Fund is required to withhold 24% of all taxable distributions and redemption proceeds ("backup withholding"). Non-U.S. investors may be subject to withholding at the applicable treaty rate. Bob's Mutual Funds will provide information about the tax character of distributions on IRS Forms 1099-DIV and 1099-B.

Frequent Trading Limitations

Overview

Frequent trading (also called market timing) can disrupt Fund management and raise costs for long-term shareholders. Excessive short-term trading may force the Fund to sell securities at inopportune times to meet redemptions, generating taxable gains and increasing transaction costs.

Frequent Trading Policy

The Fund discourages short-term trading. If you sell or exchange shares of the Fund within 30 calendar days of purchasing them, the Fund may reject your future purchase or exchange order ("the 30-day rule"). The Fund's Board of Trustees may modify or eliminate this policy at any time.

Exceptions

The following transactions are generally excepted from the 30-day rule:

- Automatic investment plans and systematic withdrawals
- Transactions involving rollovers from qualified retirement plans
- Systematic rebalancing within a fund family
- Transactions by registered investment advisers managing discretionary accounts
- Transactions in money market funds
- Dividend reinvestment plan purchases
- Transactions that are otherwise deemed by the Fund to be in the best interests of the Fund and its shareholders
- Transactions by fund of funds vehicles that invest in this Fund
- Transactions initiated by a court order or legal process
- Redemptions due to death or disability
- Redemptions to pay advisory fees under fee-based programs
- Minimum required distributions from retirement accounts

Accounts Held by Institutions

Accounts held by financial intermediaries on behalf of multiple underlying investors ("omnibus accounts") may be subject to different trading monitoring procedures. The Fund will work with omnibus account holders to monitor for excessive trading, but the Fund may not be able to identify all instances of excessive trading in such accounts.

Financial Highlights

The following table is intended to help you understand the Fund's financial performance for the past five fiscal years. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been derived from the Fund's financial statements, which have been audited by PricewaterhouseCoopers LLP.

	2025	2024	2023	2022	2021
Net Asset Value, Beginning of Period	$40.16	$41.16	$40.82	$49.13	$52.00
INVESTMENT OPERATIONS					
Net Investment Income (Loss)	$1.53	$1.57	$1.56	$1.88	$1.99
Net Realized and Unrealized Gain (Loss)	$0.15	$-1.00	$0.69	$-8.31	$-2.87
Total from Investment Operations	$1.69	$0.58	$2.24	$-6.44	$-0.88
DISTRIBUTIONS					
Dividends from Net Investment Income	$1.53	$1.57	$1.56	$1.88	$1.99
Distributions from Realized Capital Gains	$0.08	$0.00	$0.34	$0.00	$0.00
Total Distributions	$1.61	$1.57	$1.90	$1.88	$1.99
Net Asset Value, End of Period	$40.24	$40.16	$41.16	$40.82	$49.13
Total Return	4.20%	1.40%	5.50%	-13.10%	-1.70%
RATIOS/SUPPLEMENTAL DATA					
Net Assets, End of Period (Millions)	$78.6	$78.4	$80.4	$79.7	$95.9
Ratio of Total Expenses to Average Net Assets	**0.03%**	**0.03%**	**0.03%**	**0.03%**	**0.03%**
Ratio of Net Investment Income to Average Net Assets	**3.82%**	**3.82%**	**3.82%**	**3.82%**	**3.82%**
Portfolio Turnover Rate	**50%**	**50%**	**50%**	**50%**	**50%**

1. Total returns do not reflect any applicable account service fees.
2. Net investment income per share represents the net investment income divided by average shares outstanding.
3. Net realized and unrealized gain (loss) per share may not agree with aggregate net realized and unrealized gain (loss) for the period due to timing of share transactions.
4. Total distributions per share may differ from the sum of per-share distributions shown above due to rounding.

Additional Information

Precautionary Note to Investment Companies

For purposes of the Investment Company Act of 1940, any registered investment company or private fund that acquires Fund shares is subject to certain conditions and restrictions. Such an investor should consult with its legal counsel before investing in the Fund.

Forum Selection

Pursuant to the Fund's Declaration of Trust, any claim brought by or on behalf of a shareholder against the Fund or its trustees, officers, or agents must be brought exclusively in the Court of Chancery of the State of Delaware (or, if that court lacks jurisdiction, the Superior Court of the State of Delaware or the U.S. District Court for the District of Delaware).

Shareholder Rights

Shareholders are entitled to vote on certain matters as described in the Fund's Declaration of Trust and By-Laws, including the election of Trustees and the approval of material changes to the Fund's fundamental investment policies. Each share is entitled to one vote.

Securities Market Indexes

The Bloomberg U.S. Aggregate Float Adjusted Index is maintained by the index provider and is not sponsored, endorsed, sold, or promoted by Bob's Mutual Funds. The index provider makes no representation regarding the advisability of investing in the Fund. The index provider is not responsible for any inaccuracies in the index data.

Fund Identification
